Problem

These types of analysis errors appear when, after the successful execution of local analysis, there was some error during the 2nd phase of processing in the cloud.

The error message does not appear in the Kiuwan Local Analyzer, but when you visit the Kiuwan dashboard to see results, you see the log page with an error.

Solution

The exact reason for failure is indicated under **Failure cause**, linking to [Analysis Error Code Reference](#). Please visit this page for more information.
