

Code analysis using the downloaded agent

Once you have downloaded and installed **Kiuwan Local Analyzer (KLA)** (see [Installation and Network Configuration](#)), you can execute it :

- using KLA [Graphical User Interface \(GUI\)](#)
- using KLA [Command Line Interface \(CLI\)](#)
- or integrating it with any [Continuous Integration \(CI\)](#) system (please visit [Developers - Integrations](#))

If you are experiencing problems with KLA execution please visit [Troubleshooting Kiuwan Local Analyzer](#).

And, do not forget that for any kind of doubt or question, you can contact [KiuwanTechnical Support](#)
