

Kiuwan Code Analysis

This section guides you through the sections of Kiuwan Code Analysis' dashboard.

Kiuwan Code Analysis is one of the Modules offered by Kiuwan. To access it, log into your account and select **Code Analysis** from the main menu.

Kiuwan Code Security arranges security aspects into the following **dashboards**:

- **Summary:**
 - A comprehensive overview of the quality of your application.
- **Metrics:**
 - An overview of the main application metrics.
- **Defects:**
 - A quality analysis page where you can inspect and manage all the defects found in your source code, allowing you to search for specific defects, filter by type, priority and other criteria.
- **Action Plans:**
 - A tool to create an action plan for the remediation of defects.
