

# Account Limits Over Quota

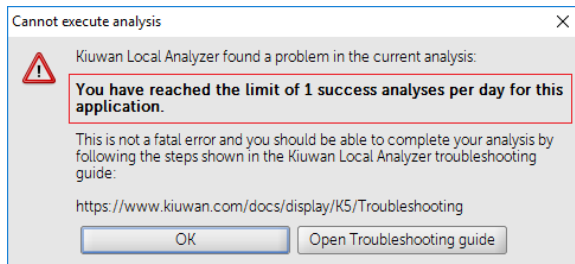

- [Problem](#)
  - [GUI mode](#)
  - [CLI mode](#)
- [Solution](#)
- [Related articles](#)

## Problem

Account limit errors are produced when some limit in the Kiuwan account quota is reached.

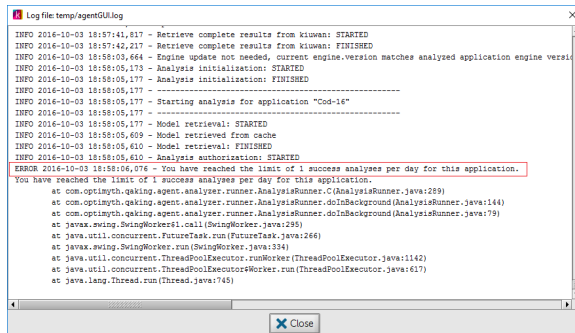

## GUI mode

If you are using Kiuwan Local Analyzer, a dialog box will appear indicating the quota exceeded:

Click **Analyzer log** to open a window where the log file `temp/agentGUI.log` is displayed.

You will find the message indicating the error.

## CLI mode

If you are using Kiuwan Local Analyzer in CLI mode, this error is reported to the standard output.

```
Kiuwan Local Analyzer found a problem in the current analysis:
You have reached the limit of 1 success analyses per day for this application.
This is not a fatal error and you should be able to complete your analysis by following the steps shown in the Kiuwan Local Analyzer Troubleshooting guide
https://www.kiuwan.com/docs/display/K5/Troubleshooting
exit code = 30
```

An error code will be returned to the calling process.

## Solution

Please contact the [technical support team](#) to learn more about the quota limit of your current subscription.
