  - Improvements in Kiuwan Site

New release of Kiuwan Engine and Local Analyzer

Improvements in Kiuwan Engine

> ⓘ New Kiuwan **Engine** (master.p471.q7474.a1734):
>
> - Kiuwan Local Analyzer can now be executed with **Java 9** JDK/JRE
> - **Enhancements in vulnerabilites detection** (mainly in Java and C#)
> - Security rules categorized according to final release of **OWASP Top-10 2017**
> - Bug fixing, performance and reliability issues in *rules*: Java, JavaScript, JSP and C#

There's also a new distribution of Kiuwan **Local Analyzer** (master.1003.p471.q7474) delivered for compatibility with new engine.

Improvements in Kiuwan Site

- *Analysis Log* page allows to *see* **applied source code filters** (includes and excludes) in the analysis.

- *Delivery pages* allow to see **delivery analysis' log**
