How to Install KOP Licenses

This guide will show you how to install KOP Licenses.

Contents:

Installation of KOP Licenses

KOP Licenses are distributed through **two license distribution zip files:**

- **license.zip**
- **configq1.zip**

The installation of the KOP licenses is different depending on whether you have already built a KOP container or not.

License installation before building the container

1. Copy both zip files to "license" directory of you KOP installation directory

    - cp license.zip $KOP_INSTDIR/license
    - cp configq1.zip $KOP_INSTDIR/license
2. Continue building your KOP image

License installation after the container is built:

> ⓘ   The below commands must be executed with the KOP container running. Do not execute them with the container stopped.

- Copy both zipfiles to "license" directory of you KOP installation directory
    - cp license.zip $KOP_INSTDIR/license
    - cp configq1.zip $KOP_INSTDIR/license
- Change to directory $KOP_INSTDIR and execute the script **applyLicense.sh**
