

Install and Start Up Kiuwan Local Analyzer

How to install and start up Kiuwan Local Analyzer (KLA)

- [How to install and start up Kiuwan Local Analyzer \(KLA\)](#)
 - [Windows / MacOS](#)
 - [Linux / Unix](#)

Windows / MacOS

1. Before you start, make sure you [meet all the requirements](#) to install the Kiuwan Local Analyzer;
2. [Download the ZIP file from the Kiuwan website](#);
3. Extract all the files from the ZIP file;
4. Open the folder and run **kiuwan.cmd** (kiuwan.sh for Mac)

5. [Run your first scan](#)

Linux / Unix

Under Unix-like systems, please check:

- You need to *change permissions for shell scripts*.
 - Use a command like "`chmod +x *.sh`" for executable permissions.
- Please *check permissions of the Unix user running Kiuwan Local Analyzer*:
 - *read/write* permissions on `AGENT_HOME/*`
 - *read* permissions on directory of source code to be analyzed by Kiuwan
