

How to Configure an Additional Email Address for Analysis Notifications

- [Problem](#)
- [Solution](#)
- [Related articles](#)

Problem

The default analysis notification mechanism consists of sending an email to the email address associated with the user who executes the analysis.

Examples of such email notifications are:

Solution

- i** You can make Kiuwan Local Analyzer send a copy of above notification emails to an additional email address by specifying :

.kiuwan.analysis.notification=someone@domain.com

This property can be set:

1. appending to **KLA command-line interface** (agent.cmd or agent.sh)
2. adding that line to **.kiuwan** file
