ET2

- **QAK-6415** PARSE ERROR para fichero PL/SQL
- **QAK-6433** Rule definition for OPT.PHP.AvoidExitOrDie references to an invalid URL
- **QAK-6434** Rule definition for OPT.PHP.AvoidSQLQueriesWithinLoop references to an invalid URL
- **QAK-6436** Parsing error file in PL/SQL in CREATE sentence
- **QAK-6444** PARSE ERROR for Transact-SQL with OVER(...) No,Name sentence
- **QAK-6450** PARSE ERROR for file PL/SQL
- **QAK-6451** Parsing errors in Transact-SQL files
- **QAK-6453** PARSE ERROR in PL/SQL file when use IS NOT NULL in case statement
- **QAK-6455** ERROR java.lang.NullPointerException on OPT.JAVA.SEC_JAVA.InsecureSSL
- **QAK-6462** Parsing errors Transact-SQL when PERSISTED keyword is used
- **QAK-6480** Parsing errors in PHP interface function definition

ET4

- **QAK-5037** QAK-4864 Posibles mejoras para CWE:404
- **QAK-5038** QAK-4864 Posibles mejoras para CWE:459
- **QAK-5050** QAK-4864 Posibles mejoras para CWE:80
- **QAK-5051** QAK-4864 Nuevas reglas para CWE:81
- **QAK-5058** QAK-4864 Mejoras para OPT.JAVA.NullDereference
- **QAK-5208** Name rule OPT.VB6.VBCD.ACGE
- **QAK-5275** Implement CSRF protection in Java Spring for Java configuration
- **QAK-5415** Review TS support for TS 4
- **QAK-5672** New .NET rule (Subverting X509Certificate.Equals)
- **QAK-6127** Clean unused criteria
- **QAK-6280** QAK-6279 Remove groovy-rules jars from engine
- **QAK-6374** Improve "InsecureTransport" rules to check for ftp connections too
- **QAK-6380** Review VBNet unreachable checker
- **QAK-6435** PARSE error para fichero SQL
- **QAK-6508** Update Kotlin language level to 1.4
- **QAK-6514** QAK-5921 Review and merge changes in QAK.5921 branch into development
- **QAK-6516** False Propagation Path HttpRequestWrapper class
- **QAK-6517** Update Swift language level to 5.3
- **QAK-6518** Update Java language level to Java 15
- **QAK-6519** Update Python language level to 3.9
- **QAK-6524** Update C# language to 9
- **QAK-6525** Timeout Error While analyzing ReactJS files
- **QAK-6530** Unparse typescript/javascript file
- **QAK-6534** Control/flow graph building does not terminate in COBOL
- **QAK-6535** Parse errors in COBOL app
- **QAK-6539** Kiwan Local Analyzer: "Timeout - killed the sub-process
- **QAK-6540** PARSE ERROR Cobol files
- **QAK-6542** Optimize Cobol's ConditionNeutralizationProcessor
- **QAK-6543** [LTA - 70.000\$] FN in rule OPT.CPP.CERTC.ARR35 "iterate beyond the end of an array"
- **QAK-6546** QAK-6246 VBNet -> Datapath - Incorrect method call
- **QAK-6548** Include/Exclude patterns do not work well with projects where a (large) list of files to scan should be used instead
- **QAK-6551** QAK-6246 Kotlin -> Datapath - Incorrect method call
- **QAK-6558** FP in OPT.JAVA.SEC_JAVA.ServerSideRequestForgeryRule and OPT.JAVA.SEC_JAVA.MailCommandInjection
- **QAK-6560** FP OPT.SWIFT.SECURITY.HardcodedUsernamePassword
- **QAK-6561** [Easirun] Parsing Error in .vb files
- **QAK-6562** Parse Error in .sql File
- **QAK-6563** Timeout Error While analyzing Java files
- **QAK-6564** Cobol parse errors
- **QAK-6566** [Telefonica] Possible FP in rule OPT.JAVA.SEC_JAVA.RegexInjectionRule
- **QAK-6567** QAK-6563 OPT.JAVA.SEC_JAVA.PotentialInfiniteLoop FPs
- **QAK-6568** QAK-6563 Disable OPT.JAVA.APackageDoesNotDependOnLessStablePackages from CQM
- **QAK-6569** C++ Rule for detecting suspect usages of std::forward
- **QAK-6570** Map C++ rules to the C++ Core Guidelines
- **QAK-6572** Wrong InjectionPoint in python
- **QAK-6576** QAK-6279 Remove groovy-rules jars from devwan
- **QAK-6577** java.lang.StackOverflowError OPT.JAVA.STR.CMPCH
- **QAK-6583** NPE IndirectTaintingSitesTask(csharp)
- **SAS-5438** heapdumps in local analyzer accumulate and fill the local filesystem

- **SAS-5439** Improve contents of the .diagnosis.txt files after an unrecoverable error during analysis in KLA
- **SAS-5481** Remove the groovy tech extensions from the LanguageInfo.properties file
- **SAS-5483** Cannot execute CPP analysis (KLA)

MT4

- **SAS-5239** BUG en endpoint DELETE /applications
- **SAS-5361** ERROR when pressing chrome back button in Kiuwan main page new user account
- **SAS-5488** Analysis with uploaded zip file does not work with new KLA

Other

- **SAS-4852** Insights - Support to add custom artifacts and vulnerabilities
- **SAS-5181** Use class attributes with user data in singleton beans
- **SAS-5399** Language combobox in the Add Custom Component window should not be editable
- **SAS-5401** Requires fields with blank spaces
- **SAS-5403** Label of the Is fixed version checkbox
- **SAS-5404** Performance in Mute Vulnerabilities tab
- **SAS-5405** Delete Affected Component is not working properly
- **SAS-5408** /insights/custom/component/list is not working properly
- **SAS-5409** Create custom component - group parameter
- **SAS-5411** NPE - Delete custom component
- **SAS-5412** Without wrong message - delete custom component
- **SAS-5415** NPE modifying licenses component
- **SAS-5424** Insights regression - Licenses without name
- **SAS-5429** No custom vulnerabilities taking account
- **SAS-5444** Redo the layout of mute vulnerabilities screen
- **SAS-5456** INSIGHTS: The vulnerabilities are not being updated correctly
- **SAS-5457** Wrong language adding custom component via API
