REST API Enhancements

- Add attribute 'muted' for the endpoint /insights/analysis/security GET method
- New endpoint: GET /applications/mutepatterns
- New endpoint: GET /applications/{application}/defect/{defectId}/firstdate
- New parameter for GET /apps/analysis/{code}/defects endpoint to filter muted status
- Add PDF download to life cycle and rest API to obtain the pdf. New endpoint GET /audits/result/componentsPDF
- New parameters for GET/insights/analysis/summary/export endpoint
- New endpoint GET/auditResult/components
- New endpoint POST/applications/defects/mute
- Change return status for PUT /users/{username} endpoint when some of the applications in the request list do not exist
- GET/stats endpoint returns new "24hlocs" value.

MT7 (Kiuwan General Bug Fixing)

- **SAS-5556** Improve Portfolio edition time
- **SAS-5627** Insights Sysadmin console induces OOM
- **SAS-5786** Add log traces to InsightResportHandler and used classes
- **SAS-5824** Change default value for new customers
- **SAS-5891** Duplicate key storing Insights' Hibernate DependencyBean
