[2024-02-22] Change Log

This release contains the following Kiuwan Engine Updates for **Kiuwan Cloud**:

Enhancements

- **SAS-6522** Show the number of applications
- **SAS-6785** Add a Rule name field to an endpoint in REST-API

Bug Fixes

- **SAS-5421** The Subscription page is immediately updated without delay
- **SAS-6781** KLA in Linux leaves files in /tmp which are not deleted upon finishing the analysis
- **SAS-6796** Language filter for language "other" is not working in REST API
- **SAS-6802** Used scans of an account do not show in Kiuwan Sales Console
- **SAS-6827** Users get deactivated without reason
- **SAS-6948** The "Consumed LOC" increased by the wrong value after scanning the application
